

oTree official session QA and Full-Path Screenshot Report

24 participants - 12 pairs - 4 treatment cells - 2 roles

Report updated: 2026-07-28

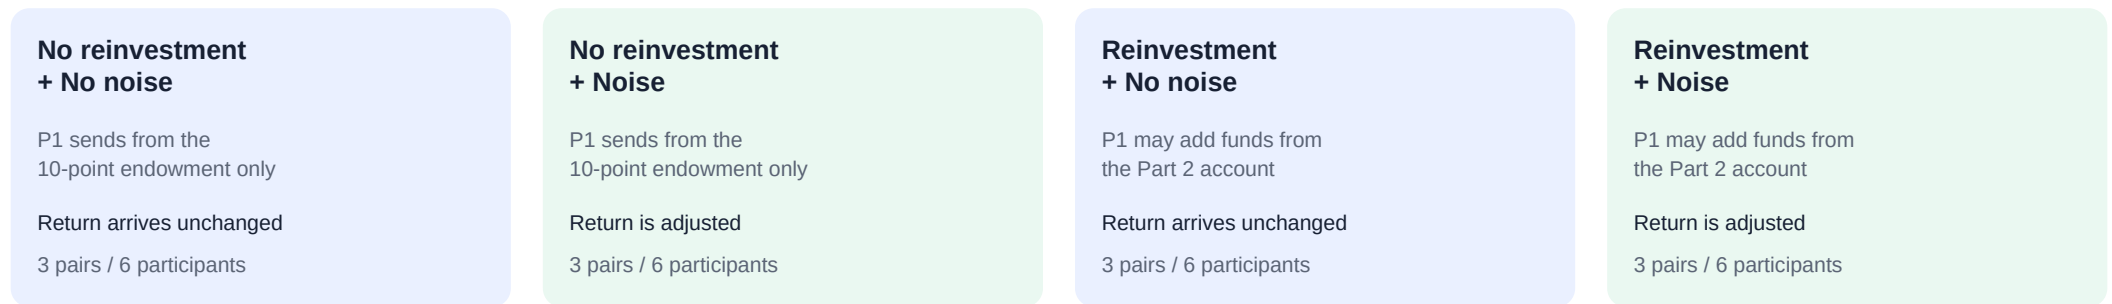

oTree version: 5.11.5

Base official QA session: 0rlp0cm2

Affected participant pages were re-captured in treatment-pinned trials after the 2026-07-28 source fixes.
Devserver debug information was cropped from the screenshots; only participant-visible content is shown.

Part 2 treatment cells

Within each round

P1 sends and predicts P2's return while P2 predicts P1's send -> P2 receives 3x the send -> P2 chooses a return -> both see results.

Noise cells: return x 0.5 (10%), x 1.0 (80%), or x 1.5 (10%); P1 sees only the realized return. Part 2 has a 24-round hard cap.

Front matter

1 Cover 2 Experiment flow and treatments 3 Contents 4 Validation scope and results

Common pages - pages 5-31

5-11	Introduction, role assignments, Part 1 instructions and quizzes
12-18	Part 1 round 1: P1 decision, P2 belief, waits, P2 return, P1/P2 results
19-22	Part 1 round 2: P1 decision, P2 belief, P1/P2 results
23-26	Part 1 round 3: P1 decision, P2 belief, P1/P2 results
27-29	Part 2 setup wait, transfer wait, return wait
30-31	Final survey and final session wait

Part 2 treatment-role paths - pages 32-105

32-40	No reinvestment + No noise - Player 1
41-50	No reinvestment + No noise - Player 2
51-59	No reinvestment + Noise - Player 1
60-69	No reinvestment + Noise - Player 2
70-78	Reinvestment + No noise - Player 1
79-88	Reinvestment + No noise - Player 2
89-96	Reinvestment + Noise - Player 1
97-105	Reinvestment + Noise - Player 2

Screenshot order within each Part 2 path

Player 1: Instructions -> Quiz -> Round 1 decision -> Round 1 result -> Round 2 decision -> Round 2 result -> Round 5 result
-> representative stopping-round result (if later than round 5) -> Final Results.

Player 2 follows the same order, with a separate Round 1 return-decision page after the Round 1 belief page.

Identical intermediate-round layouts are not duplicated.

- Session composition: 24 participants and 12 pairs, with exactly 3 pairs in each 2x2 treatment cell.
- Stage 1: All three fixed-pair rounds completed, including beliefs, transfers, returns, waits, payoffs, and accumulated accounts.
- Stage 2: Pairs stopped independently after the five-round minimum; stopped pairs did not re-enter the game.
- Representative stopping rounds: R+Noise round 5; No-R+Noise round 10; R+No-Noise round 12; No-R+No-Noise round 15.
- Reinvestment check: In round 2, Player 1 sent 12 points: 10 from the current endowment and 2 from the account. The resulting account balance was correct.
- Noise check: Player 1 saw only the realized return; Player 2 did not see the post-noise amount received by Player 1.
- Final flow: 24/24 reached the survey, FinalWait, and FinalResults. No browser console errors were observed.

Screenshot organization: common pages first, followed by every distinct state across 4 treatment cells x 2 roles.

Repeated rounds use rounds 1, 2, 5, and the representative pair's stopping round; identical intermediate layouts are not duplicated.

Experiment introduction shown to every participant.

Decision Task

You will be randomly matched with another player. You will also be randomly assigned a role: player 1 or player 2. Your matched player and your role will remain the same throughout the experiment.

The experiment has two parts and a short final questionnaire.

Your earnings from Part 1 and Part 2 will be kept in two separate accumulated accounts: a Part 1 account and a Part 2 account. These accounts are tracked separately during the experiment. At the end, you will answer a short questionnaire. Your final payment is based on the total number of points in the two accounts combined. For this session, each point is worth \$0.10.

Next

Player 1 role confirmation.

Your Role

You have been assigned to the role of player 1.

Your role will remain the same throughout the experiment.

Next

Player 2 role confirmation.

Your Role

You have been assigned to the role of player 2.

Your role will remain the same throughout the experiment.

Next

Part 1 rules for Player 1.

Part 1 Rules

Part 1 has 3 rounds. The same rules apply in every Part 1 round.

In each round, you receive 10 points and choose how many points, from 0 to 10 points, to send to player 2.

Player 2 receives **three times** the amount you send. After receiving this amount, player 2 chooses how many points to return to you.

In each round, earnings are calculated as follows:

your earnings = points kept from the endowment + points returned by player 2

player 2 earnings = amount player 2 receives - points returned to you

At the end of each round, your earnings from that round are added to your Part 1 accumulated account.

In each round, each player will see the other player's decision and both players' earnings for that round.

Next

Part 1 rules for Player 2.

Part 1 Rules

Part 1 has 3 rounds. The same rules apply in every Part 1 round.

In each round, player 1 receives 10 points and chooses how many points, from 0 to 10 points, to send to you.

You receive **three times** the amount player 1 sends. After receiving this amount, you choose how many points to return to player 1.

In each round, earnings are calculated as follows:

player 1 earnings = points kept from the endowment + points returned by you

your earnings = amount you receive - points returned to player 1

At the end of each round, your earnings from that round are added to your Part 1 accumulated account.

In each round, each player will see the other player's decision and both players' earnings for that round.

Next

Player 1 comprehension check.

Part 1 Quiz

Please answer these questions before Part 1 begins.

If you send 4 points in Part 1, how many points does player 2 receive?

If you send 4 points and player 2 returns 5 points, how many points do you earn in that round?

Next

Player 2 comprehension check.

Part 1 Quiz

Please answer these questions before Part 1 begins.

If player 1 sends 4 points to you in Part 1, how many points do you receive?

If player 1 sends 4 points to you and you return 5 points, how many points do you earn in that round?

The same final survey is used for every treatment-role path.

Final Survey

Please answer a few final questions. Your answers are confidential and do not affect your payment.

What is your gender?

- ☐ Female
☐ Male
☐ Other
☐ Prefer not to say

What is your age?

How willing are you to take risks in general? (1 - Not at all willing, 7 - Very willing)

- ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7

Generally speaking, would you say that most people can be trusted, or that you need to be very careful in dealing with people? (1 - Need to be very careful, 7 - Most people can be trusted)

- ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7

In general, how willing are you to trust other people? (1 - Not at all willing, 7 - Completely willing)

- ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7

Next

Participant instructions for this treatment-role path.

Part 2 Rules

Your pair remains the same. The same rules apply in every Part 2 round.

In each round, you receive 10 points and choose how many points, from 0 to 10 points, to send to player 2.

Player 2 receives **three times** the amount you send.

You and player 2 will see the amount player 2 receives. Player 2 then chooses how many points to return to you.

$\text{your earnings} = \text{points kept from the current-round endowment} + \text{points returned by player 2}$

$\text{player 2 earnings} = \text{amount player 2 receives} - \text{points returned to you}$

At the end of each round, your earnings from that round are added to your Part 2 accumulated account.

Part 2 lasts for at least 5 rounds. After round 5, at the end of each round there is a 15% chance that Part 2 ends and an 85% chance that your pair continues for one more round.

Part 2 Quiz

Please answer these questions before Part 2 begins.

In your Part 2 rules, can you use points from your accumulated account in the current round?

- ☐ Yes
- ☐ No

If you send 4 points to player 2, how many points does player 2 receive?

- ☐ 1
- ☐ 4
- ☐ 7
- ☐ 12

For the next question, suppose player 2 chooses to return 4 points to you.

How many points reach you?

- ☐ 2
- ☐ 4
- ☐ 6
- ☐ 12

What is the most you can send to player 2 in a round?

- ☐ Only your current-period endowment
- ☐ Your current-period endowment plus your accumulated account
- ☐ Three times your current-period endowment
- ☐ Any amount, with no limit

Participant instructions for this treatment-role path.

Part 2 Rules

Your pair remains the same. The same rules apply in every Part 2 round.

In each round, you receive 10 points and choose how many points, from 0 to 10 points, to send to player 2.

The amount you send is multiplied by 3, and player 2 receives the full multiplied amount. Player 2 then chooses how many points to return to you. The computer applies a random adjustment to the amount player 2 returns before it reaches you:

- 80% chance: amount that reaches you = amount player 2 returns
- 10% chance: amount that reaches you = amount player 2 returns $\times 0.5$
- 10% chance: amount that reaches you = amount player 2 returns $\times 1.5$

your earnings = points kept from the current-round endowment + amount that reaches you from player 2

player 2 earnings = amount player 2 receives - points player 2 returns

At the end of each round, your earnings from that round are added to your Part 2 accumulated account.

You see only the final amount that reaches you after the computer adjustment, not the amount player 2 chose to return.

Part 2 lasts for at least 5 rounds. After round 5, at the end of each round there is a 15% chance that Part 2 ends and an 85% chance that your pair continues for one more round.

Participant instructions for this treatment-role path.

Part 2 Rules

Your pair remains the same. The same rules apply in every Part 2 round.

In each round, player 1 chooses how many points to send to you. The amount player 1 sends is multiplied by 3, and you receive the full multiplied amount. You then choose how many points to return to player 1. The computer applies a random adjustment to the amount you return before it reaches player 1:

- 80% chance: amount that reaches player 1 = amount you return
- 10% chance: amount that reaches player 1 = amount you return $\times$ 0.5
- 10% chance: amount that reaches player 1 = amount you return $\times$ 1.5

player 1 earnings = points player 1 keeps from the endowment + amount that reaches player 1

your earnings = amount you receive - points you return to player 1

At the end of each round, your earnings from that round are added to your Part 2 accumulated account.

Player 1 sees only the final amount that reaches them after the computer adjustment, not the amount you chose to return.

Part 2 lasts for at least 5 rounds. After round 5, at the end of each round there is a 15% chance that Part 2 ends and an 85% chance that your pair continues for one more round.

Part 2 Quiz

Please answer these questions before Part 2 begins.

In your Part 2 rules, can the points sent to you include points from player 1's accumulated account?

- ☐ Yes
- ☐ No

If player 1 sends 4 points to you, how many points do you receive?

- ☐ 1
- ☐ 4
- ☐ 7
- ☐ 12

For the next question, suppose you choose to return 4 points to player 1, and the computer adjustment for this round is $\times 0.5$.

How many points reach player 1?

- ☐ 2
- ☐ 4
- ☐ 6
- ☐ 12

What is the most player 1 can send to you in a round?

- ☐ Only player 1's current-period endowment
- ☐ Player 1's current-period endowment plus their accumulated account
- ☐ Three times player 1's current-period endowment
- ☐ Any amount, with no limit

Your Part 2 accumulated account balance is **94 points**.

Your final accumulated account balance is **118 points**.

At \$0.10 per point, your final payment is **\$11.80**.

Thank you for participating.

Participant instructions for this treatment-role path.

Part 2 Rules

Your pair remains the same. The same rules apply in every Part 2 round.

In each round, you receive an endowment of 10 points. You may send points to player 2 from this endowment and from your Part 2 accumulated account.

amount you send = points from the current-round endowment + points from your Part 2 accumulated account

Player 2 receives **three times** the amount you send.

You and player 2 will see the amount player 2 receives. Player 2 then chooses how many points to return to you.

your earnings = points kept from the current-round endowment + points returned by player 2

player 2 earnings = amount player 2 receives - points returned to you

At the end of each round, your earnings from that round are added to your Part 2 accumulated account, and any points you sent from that account are subtracted from it.

Part 2 lasts for at least 5 rounds. After round 5, at the end of each round there is a 15% chance that Part 2 ends and an 85% chance that your pair continues for one more round.
